What is Address Resolution Service?

Make every residential address in your database valuable with Address Resolution Service (ARS). ARS ensures that records deemed “broken” by CASS or DPV® can be repaired and returned back to your list, so it’s ready for prompt and efficient delivery, and saves you money by optimizing postage rates and getting your message into the hands of the right audience.

What is PCOA?

Did you know that 40% of all moves are never filed as a change of address with the USPS? Well, Proprietary Change of Address, or PCOA, processing alleviates this issue by using trusted third-party databases to find records that cannot be found using NCOALink® alone.

What is NCOALink®?

NCOALink® is the USPS service that contains the names and addresses of individuals, families, and businesses that have filed a permanent change of address with the United States Postal Service®.
